# AREA PRO: SUPERIOR PERFORMANCE

As a „construction kit“, the Area Pro collection in Coherent’s new building serves every space requirement.

The Area Pro series makes a cool statement for the high-tech company Coherent, right down to every angle.

In Coherent’s new building, various functions are bundled under one roof, including administration, development and production. The focus is on sustainable building construction. Ceramic flooring: Area Pro by Agrob Buchtal.

Area Pro stretches the space. Maximum flexibility and spaces that can react as easily as quickly to changing requirements are part of Coherent's new work concept, not only in the canteen with its adjacent meeting room.

A modern open-office concept with this canteen promotes the required level of encounter, exchange and flexibility, where team meetings also find their appropriate place.

Area Pro: The fresh idea for design floors
